

EFFECT OF GEL ON BURN

UNIQUE PROPERTIES OF HERBAHEAL GEL

- HerbaHeal gel contains ingredients that have natural cooling properties. This can provide immediate relief from the burning sensation associated with burns.
- Herbal ingredients in gel possess anti-inflammatory properties that help reduce swelling and redness around the burn site.
- HerbaHeal gel contains ingredients that help to keep the skin hydrated. This is important for promoting the healing process and preventing the skin from drying out.
- The unique combination of extracts have antimicrobial activity.
- Through in vitro and in vivo studies, HerbaHeal gel has been shown to accelerate the body's natural healing processes and promote an optimal burn healing process.

EFFECTIVE BURN HEALING MANAGEMENT

Pankajakasthuri HerbaHeal Gel was developed with the financial support of DST-SHRI, a project focused on the standardisation and product development of traditional medicinal knowledge of the Malayali tribal community. This is an excellent initiative that can contribute to preserving indigenous wisdom, promoting sustainable practices, and providing healthcare solutions rooted in local traditions.

The formulation/product was standardised by Pankajakasthuri Ayurveda Medical College & PG Centre. The product will be manufactured under the Scientific Social Responsibility Initiatives by Pankajakasthuri Herbals India (P) Ltd. for the Palamalai traditional Malayali healers self-help group.

BURN HEALING EFFECT

Pankajakasthuri HerbaHeal gel recorded significant burn healing effect with burn contraction potency. The activity observed is comparable with that of the standard (silver sulfadiazine). Hence this product can act as a good burn healer.

BURN HEALING EFFECT OF THE GEL

HerbaHeal gel decreases the IL-6 and TNF- α production. Hence it can be concluded that this gel may have antiinflammatory effect via inhibiting the proinflammatory cytokines.
